

GLYPHO-BAN (No GLYPHOSATE)

PROTECT YOUR BUSINESS, EMPLOYEES & CUSTOMERS

Xtreme Prevention is leading the way in pioneering safe yet effective chemistries to replace commonly used herbicides which contain the active ingredient glyphosate. While it is well known that traditional herbicides must be registered with the EPA's Pesticide and Herbicide division, Glypho-Ban GC60 is "EXEMPT" from FIFRA Registration under the Code of Federal Regulations, 40CFR 152.25 (f).

With all of the lawsuits that have surfaced surrounding glyphosate based herbicides, many Counties, Cities, Schools, States and Countries have, or are banning products that contain glyphosate.

Finally, there is a powerful, yet safe and effective solution. Glypho-Ban GC60 is a non-specific herbicide that contains NO GLYPHOSATE and kills weeds to the root. Glypho-Ban GC60 is an immediate solution that eliminates the health and liability exposure of your workforce and organization to glyphosate based products.

APPLICATIONS

Non-Specific Weed Killer: Apply to a broad spectrum of weeds and grasses to kill and control their growth.

USES

The broad spectrum performance and non-hazardous formula makes Glypho-Ban GC60 perfect for use in: Counties, Cities, Parks & Recreation, Schools, Sports Fields, Golf Courses, Water Agencies, Vegetation Management Agencies & more.

GLYPHO-BAN BENEFITS

- Fast-Acting Kill Time
- Non-Hazardous & Safe to Use
- Non-Specific & Kills to the Root
- Replacement for Herbicides that Depend on Glyphosate
- FIFRA Minimum Risk Exempt Formulation
- Safe to Spray Around Ponds & Lakes - Will Not Harm Fish
- Lower Insurance Rates Possible
